

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1. – 5. (cancelled)

6. (currently amended) A method for initiating a phone call, the method comprising the steps of:

receiving a call initiation request, the call initiation request including a primary phone number corresponding to a first user; ~~and~~

storing the primary phone number to a computer readable memory;

requesting an authorization from a second user to initiate the call;

dialing the primary phone number upon receiving the authorization; and

deleting the primary phone number from the memory.

7. (original) The method of claim 6 further including the steps of transmitting an authorization request to a wireless phone user interface.

8. (original) The method of claim 6 further including the step of transmitting an authorization request to a land line connection.

9. (original) The method of claim 6 further including the step of receiving a line of sight signal, the line of sight signal including the call initiation request.

10. (cancelled)

11. (cancelled)

12. (currently amended) The method of claim 6 ~~40~~ further including the step of deleting the primary phone number from the memory upon receiving a denial from the second user.

13. (cancelled)

14. (currently amended) A wireless call management system comprising:

a computer readable memory for storing the phone numbers corresponding to the remote users;

a request module for transmitting outgoing call initiation requests to remote users based on local requests from a local user, the outgoing call initiation requests including a phone number corresponding to the local user;

an initiation module for requesting authorizations from the local user based on incoming call initiation requests, ~~the incoming call initiation requests~~ including phone numbers corresponding to the remote users, the initiation module further operable to store the phone numbers associated with the incoming call initiation requests in the computer readable memory and to delete the phone number from the computer readable memory at a subsequent time; and

a wireless phone user interface for generating the outgoing call initiation requests based on the local requests for initiation of phone calls, the user interface further transmitting authorization requests to the local user based on the incoming call initiation requests.

15. (cancelled)

16. (original) The call management system of claim 14 further including a signaling system for transmitting the outgoing call initiation requests and receiving the incoming call initiation requests.

17. (original) The call management system of claim 16 wherein the signaling system transmits and receives line of sight signals.

18. (original) The call management system of claim 17 wherein the signaling system includes an infrared transceiver for transmitting and receiving infrared signals.

19. (new) A method for initiating a phone call, the method comprising the steps of:

receiving a call initiation request, the call initiation request including a primary phone number corresponding to a first user; ~~and~~

storing the primary phone number to a computer readable memory;

requesting an authorization from a second user to initiate the call; and

deleting the primary phone number from the memory after a predetermined period of time.

20. (new) The method of Claim 19 wherein the call initiation request is received in a line of sight signal.

21. (new) The method of Claim 19 further comprises dialing the primary phone number upon receiving the authorization.

22. (new) A method for initiating a phone call, the method comprising the steps of:

receiving a call initiation request, the call initiation request including a primary phone number corresponding to a first user; ~~and~~

storing the primary phone number to a computer readable memory;

requesting an authorization from a second user to initiate the call; and

deleting the primary phone number from the memory upon receiving a denial from the second user.

23. (new) The method of Claim 22 wherein the call initiation request is received in a line of sight signal.

24. (new) The method of Claim 22 further comprises dialing the primary phone number upon receiving the authorization.
